

# Day-2019-02-19

- I changed the default timezone in DokuWiki to my local region. I did this by using Trasmitt to edit `conf/local.php`, adding the line:

```
date_default_timezone_set('Australia/Perth');
```

Apparently this edit will be lost if I do future configuration through the GUI, so this will be one to watch.

- My work today saw me travelling from one side of Perth to the other. In between meetings I utilised two different public libraries. Both were excellent facilities. We are fortunate to have these community spaces that offer a great place to do work.
